SUMMARY

Software engineer with experience building and integrating web and cross-platform mobile applications in financial services and healthcare. Strong in Angular, Vue, Ionic, Capacitor, Cordova, and .NET, with additional native iOS and Android integration experience. Former computer science educator who communicates complex technical concepts clearly and works well across product, engineering, and non-technical teams.

TECHNICAL SKILLS

- **Frontend & mobile:** TypeScript, JavaScript, Angular, Vue.js, Ionic, Capacitor, Cordova, Progressive Web Apps
- **Native & platform integration:** Swift, Kotlin, iOS, Android, Firebase, MyChart SDK
- **Backend & delivery:** Node.js, GraphQL, C#, .NET, REST APIs

PROFESSIONAL EXPERIENCE

Blue Cross and Blue Shield of North Carolina — via Motion Recruitment

Senior Hybrid Developer (Contract) | May 2026 – Present

- Build new pages and reusable frontend components for a Vue application backed by Node.js and GraphQL services.
- Migrate application functionality from Vue 2 to Vue 3.
- Implement Figma designs as responsive, production-ready application interfaces.
- Develop API and frontend application features across the platform.

Security Service Federal Credit Union — Remote, San Antonio, TX

Hybrid Mobile Developer | March 2023 – May 2026

- Built and maintained a member-facing mobile banking application for iOS and Android using Ionic, Angular, and Capacitor.
- Created native builds and custom Capacitor and Cordova plugins; integrated the mobile client with existing banking systems and APIs.
- Developed an internal dashboard for monitoring reports from the mobile application and other internal systems.
- Modified and integrated C#/.NET APIs supporting the mobile application and dashboard.

FactSet Research Systems — Remote, via Randstad

Software Engineer (Contract) | August 2022 – February 2023

- Implemented Vue.js interfaces for a FinTech mobile application.
- Adapted the authentication experience for tablet form factors, with attention to standard iPad screen sizes.
- Ported web dashboard designs to a responsive mobile frontend and maintained multiple authentication flows.
- Diagnosed application crashes and other defects; maintained iOS and Android native shells used to package the Vue application.

CHRISTUS Health — Irving, TX

Application Developer | May 2022 – August 2022

- Built native mobile application integrations with electronic health record systems.
- Connected the MyChart SDK to mobile frontends using Kotlin and Swift, including deep links and Firebase push notifications.
- Designed emergency-alert system integrations in C# and .NET, connecting with existing hospital systems.
- Managed iOS application standards and release requirements.

Silver Bullet Web Solutions — Bowie, TX
Software Engineer | April 2021 – April 2022

- Designed and implemented an employee and ticket-management system for contracting companies.
- Built a cross-platform progressive web application with Angular, Ionic, and Cordova, using TypeScript, HTML, and CSS on the frontend and a PHP REST API on the backend.

TEACHING EXPERIENCE

Dexter School — Wichita Falls, TX
Computer Science Educator | October 2021 – May 2022

- Designed and delivered computer science curriculum for students in grades 5–12.
- Taught AP Computer Science, Advanced Computer Science Foundations, Mobile Game Design, Robotics, and 3D Printing; also tutored Computer Science Foundations and Scratch Programming.

Midwestern State University — Wichita Falls, TX
Adjunct Professor, Computer Science | January 2021 – July 2021

- Designed course materials and taught Data Structures & Algorithms and Game Development to undergraduate students.

EDUCATION

M.S., Computer Science — University of North Texas, Denton, TX | May 2023 | GPA: 3.5

B.S., Computer Science — Midwestern State University, Wichita Falls, TX | December 2019 | GPA: 3.7/3.9
